DESCRIPTION

ABOUT ME:

I am 26 years old. I live in Zadar.

I finished the Electrical Installer course, but I found myself working on a computer more.

I have no work experience registered in such a job.

I know programming as (Frontend developer) (UI developer) for web design.

Also, I worked and maintained computers, generally everything related to computers.

I worked on connecting LANs. Working on windows systems is not unknown to me.
